

# SEAT CLEAT™

## 'No Squeak' I-Joist Hangers

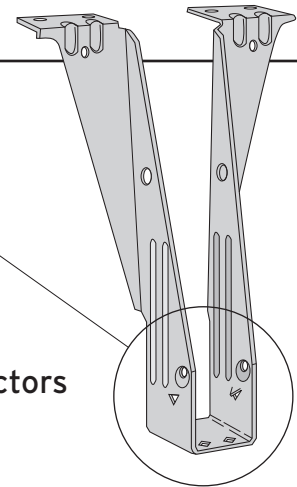

Positive Seating for I-Joist Bottom Flanges

The *Seat Cleat™* automatically locks I-Joists to the bottom of the hanger while you drive nails into dimpled guides.

This tight fit eliminates joist movement in the hanger.

U.S. Patent #5,564,248

### Simple and easy to use

- No tabs to bend
- No awkward nailing into top of I-Joist bottom flanges
- No damage to I-Joist as possible with other brand connectors

### *Seat Cleat™* Features

- I-Joist seats firmly with the tap of a hammer
- Holds I-Joist while you nail, prevents spring back during nailing
- Works with I-Joists and solid members

(For a complete list of USP products featuring the *Seat Cleat™*, see reverse side of this flyer) →

USP supplies quality products to build Stronger Safer Structures
